

# 6.12.0

16/04/2024 11:40 am BST

## Link Documents and Images to Issues

With release 6.12.0, images and documents can now be linked to issues. Users can either link an existing file or upload a new file. Just begin at the Issue Tracking screen, select the issue, then select Linked Documents.

## Item Status Upgrades

We have three upgrades to the Item Status screen:

1. The Stock Transactions view will now show stock adjustments made from inside the workflow and from stock.

The screenshot shows the Item Status screen with the 'Stock Transactions' view selected. The table displays the following data:

Transaction	Reason	Change Qty	Actual Qty	WIP Change Qty	Inventory State	Location
Rollback Stock Adjust						
Receive		1	1	0	Available	Default
Move		1	1	0	Available	V5
Stock Adjust	Mistake	.005	1.005	0	Available	V5
Stock Adjust	Mistake	1	2.005	0	Available	V5

2. The Summary view will now show the asset status of the workcentre.

Wo... Type	Operation	Qty	Visit Sta...	Plan Sta...	Use...	Work Centre	Next Acti...	Op Progress
Production n2	CS-MetalDetectionActivity (60)	1	WIP	Active		CS-MetalDetectorWorkCenter1 <b>Broken Down</b>	CS-Quality Checklist	50

3. The Timeline view will now show Shop-floor Moves and successful label Print actions.

Type	Timestamp	User	Visit Count	Event
Workflow	17/01/2023 12:35:20 AM	Chris Svoboda	1	Item routed from Start Scheduled New to CS-SewingActivity

Shop-floor Move	17/01/2023 12:40:19 AM	Chris Svoboda	1	Dropped Off at CS-OverturnWCG

## New Operator Button – Continue and Return to Workstation

We have added a new button for operators. 'Continue-Return to Workstation' allows operators to stay booked on to a job but still have the ability to return back to the workstation. This feature is for operators that routinely book onto multiple jobs simultaneously and would like to bounce between them without booking off.

## By Customer Request...

- All version names can now standardized and can be saved with up to 50 characters.
- The **Order Qty** column has been added to the **Planned Work List** grid.
- We have improved the load speed on PowerBI reports.
- The naming conventions for all new notes have been standardized.
- New permission **Manage Job Documents** allows the user to add documents to jobs.
- The **Activities** grid can now be exported to excel.
