This documentation provides technical information on the endpoints available to call through the Eyelit MES-M Public API relating specifically to Material Consumptions functionality. The endpoints covered are listed in Table 1.

Table 1 - Summary of Product-Related Public API Endpoints

API Endpoint	High Level Description
/api/Build/Build	Actions the consumption of a child item against a parent, also supports creation of child item if required
/api/Build/Remove	Removes a child item from a parent item with a reason

The documentation also covers a sample use case for a Build interface and presents a sample flow diagram representing business logic.
